Lisa Collins
Contractor Software Corporation
4879 Viewridge Avenue
San Diego, CA 92123-1643

To Whom It May Concern:

We have been using Contractor V since January 2001. Prior to Contractor V we been using Contractor III. We've been dealing with Contractor Software Corp for about 10 years now and are very pleased with their products and support.

When doing the research for a new computer system, we found that they were v informative and knowledgeable. We were able to purchase all our hardware at time, and whenever a need arises, all we need to do is make one phone call and take care of whatever our problems may be, whether it is software or hardware i

Consoft is located in San Diego, which is ideal, because we were not going to d company that would have to delay helping us due to travel issues. We get fast and the people working for Consoft are very professional people to work with.

When we first purchased Contractor V, we decided to go ahead and have someo in and do some training with our staff. We were quick to see that we wouldn't worry about how difficult this would be, because the program is so user friendly

We look forward to a continuing relationship with Consoft.
